What was the identified problem/need or gap that led to the development of this program? Please use quantitative or qualitative data to explain.

What is the behavior change/prevention theory and/or science-base that supports the rationale that this program is effective?

What risk and/or protective factors are addressed/expected to change for program participants?

What area is served by this program? Please include the Regional Public Health Network or area.

What population is served by this program?

When was this program developed?

Please respond to the following.

	Yes	No
Is the program delivered in a structured way so that it could be replicated?	<input type="radio"/>	<input type="radio"/>
Is there evidence that the program has been effective? Evidence can include anecdotal evidence or observations.	<input type="radio"/>	<input type="radio"/>
Is there an evaluation plan?	<input type="radio"/>	<input type="radio"/>
Is the program currently being evaluated?	<input type="radio"/>	<input type="radio"/>
Have evaluation tools been developed?	<input type="radio"/>	<input type="radio"/>

If applicable, briefly describe the methodology used to evaluate the program.

If applicable, briefly describe the outcomes to date.

Please describe your intentions for the program going forward. For example, do you plan to replicate the program in additional locations or multiple settings and/or enhance program evaluation?

I understand that by submitting this form that, if approved, my program will be included in the New Hampshire Innovative Prevention Program and Best Practice Inventory and is eligible (but not required) to participate in the NH Service to Science process. Participating in the Service to Science process includes at minimum:

- Participation in one or more technical assistance meetings with the Center for Excellence staff
 - A presentation to the NH Best Practices in Prevention Expert Panel
- Programs that participate in the Service to Science process are eligible to apply for NH Service to Science funding.

I understand
